

AHIMA's 76th Convention and Exhibit: Exploring the Wide World of HIM

Save to myBoK

2004 Convention Wrap-Up

AHIMA's 76th National Convention and Exhibit was a resounding success, setting a new attendance record as 4,000 HIM professionals gathered in Washington, DC. In conjunction with the 14th Congress of the International Federation of Health Records Organizations, AHIMA brought together HIM professionals from around the globe to share and discuss challenges of the evolving world of HIM. Attendees drew from a wealth of information and experience, with speakers from all over the world and a keynote presentation by national health information technology coordinator David Brailer, MD, PhD.
